

Colne Valley High School Curriculum Intent – Expressive Arts

In Expressive Arts we focus on developing a deeper knowledge and understanding of the arts in order to nurture creativity. We encourage students to express themselves with flair and confidence; developing tolerance and understanding through practical exploration. Students repeatedly encounter, revisit and expand on knowledge, skills and techniques throughout KS3 and KS4.

Creative skills are seen as influential in developing well-rounded individuals within the community and society, promoting social and cultural capital. This will allow all students to be successful at KS4 and have the opportunity to study and/or take part in the arts, whatever their background. Moreover, seek happiness in their individuality.
